MAE Students won the Champion at the 3rd Greater China Design Competition

An outstanding team (Ting Sin Hang (5th right), Yeung Chi Ling (3rd right), Evelyn Julipalas (2nd right), Chan Chung Ho (5th left) and Cheung Kai Hung (3rd left)) from the Department of Mechanical and Automation Engineering, won the Champion in the Third Greater China Design Competition (GCDC), held in Guangzhou on 22-23, March 2014.

The competition was hosted by Institution of Mechanical Engineers (Hong Kong Branch). The objective was to design and perform test of a material transporter that can deliver granular material up and down stairs and empty as much material as possible into a container within 10 minutes time limit. The team led by Dr. Li Yiyang (1st left) and the assessors Leung Yun Yee, Yip Chun Wa (1st right) and Lau Ka Chun (4th right), has competed among nine contesting teams representing eight universities from Hong Kong, Macau and China. With its innovative design, excellent presentation skills and demonstration, the CUHK team won the Champion.
